

Ceramic Fiber Modules

Being prominent ceramic Fiber modules manufacturer in India, we prepare ceramic fiber modules using high quality SIMWOOL fiber blanket.

Characteristics

- Our ceramic fiber modules are available in different length, size and it can be quickly customized as per customer specifications.
- The ceramic Fiber modules manufactured with us are suitable for various industry applications serving large customer base in India and worldwide.
- Our ceramic Fiber modules are light weight having low heat storage and durable services.

Technical Index

Classification temperature (°C)	1260	1425
Colour	White	
Fiber Diameter (µm)	2.5 ~ 4	
Non Fibrous content by wt. (%)	30 Max.	
Theoretical Density (kg/m ³)	128,160,192	
Chemical Composition (%)		
Al ₂ O ₃	43-47	30-34
SiO ₂	53-58	48-55
Zr ₂ O ₂	-----	13-18
Other	Traces	Traces
Module size (mm)	150 x 305 x 305 175 x 305 x 305 200 x 305 x 305 225 x 305 x 305 250 x 305 x 305 275 x 305 x 305 305 x 305 x 305	

- Other sizes available on special order.
- All data represents typical results of standard tests conducted under controlled conditions. As such, the information is intended only as a general guide for specifications and design estimates.
