

Ceramic Fiber Rope

Product Description

At Simond Fibertech Limited, we are the leading ceramic fiber rope suppliers selling our product in domestic and international market as well. Our ceramic fiber ropes are made up of blanket strips reinforced with glass fiber and optionally steel wire

- The ropes usually contains small amount of binder material that does not affects the insulation properties and it can burned at low temperatures.
- The ropes can be used for high temperature applications up to 2300° F.
- The ropes manufactured with us are highly flexible, durable and light weight.

Being most proficient ceramic fiber rope suppliers, our ceramic ropes are suitable across various industrial sectors like Foundries, refineries and power plants, welding, chemical plants, and refineries. Square and round braided ropes are more dense and solid as compared to twisted ropes.

Available in Diameter of 8mm, 13mm, 19mm, 25mm, 38mm & 50mm
